Examiner's Amendment

- 1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- 2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Edward Meilman on June 28, 2004.

The application has been amended as follows:

- Claim 3, last line: after "particle", the following phrase was inserted: ", and wherein the composite magnetic material possesses a real number part μ' of the complex permeability of at least 1.5 and a gain Q value of at least 80 when measured at a frequency of 2 GHz by the S-parameter method";
- Claim 17, line 2: "um" was replaced with "μm";
- Claim 19, last line: after "particle", the following phrase was inserted: ", and wherein the composite magnetic material possesses a real number part μ' of the complex permeability of at least 1.5 and a gain Q value of at least 80 when measured at a frequency of 2 GHz by the S-parameter method"; and
- Claim 25, line 2: "um" was replaced with "μm";

Reasons for Allowance

3. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious the use of a spinel type ferrite having a composition represented by (NiO)_x(CoO)_y(MeO)_z(Fe₂O₃)_{1-x-y-z}, where Me is at least one selected from the group consisting of Mg, Cu and Zn, wherein the claimed ferrite is further optimized to possess a real number part m' of the complex permeability of at least 1.5 and a gain Q value of at least 80 when measured at a frequency of 2 GHz by the S-parameter method.

While the prior art of record discloses ferrites for use as inductors, the prior art of record fails to teach or render obvious both the selection of the exact alloying components, as well as the optimization of the relative percentages of the various components inorder to achieve the claimed unexpected combination of property limitations.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
